

# Join us for the future of water

## Call for Video Entries

**Applicant  
Eligibility**

**15~18**

aged  
those of high school age

**Now accepting  
entries**

next call **6/1 ~**  
2022 June 1

Create a three-minute video in English related to an aspect of water which you are involved in or interested in, such as water disasters, clean-up activities along rivers and coastal areas, global water challenges, or marine plastics, and share it with the world. Your videos will be posted on our website and shown at the 9th World Water Forum in Dakar, Senegal on March, 2022, and the 4th Asia-Pacific Water Summit in Kumamoto, Japan, in April, 2022.

We go forward together with the younger generation from across the world to solve water-related issues. We are looking forward to your participation.

Please refer to the following information for details

# What we can do for the future of water.

## What is the Youth Water Forum?

Water is both a global issue and a local one, affecting every area of Japan. If we are to resolve water challenges, cross-generational efforts are needed.

Therefore, we have launched a platform for the youth: "the Youth Water Forum", in order to involve the young people of high-school age. A sustainable future depends on how the younger generation deals with water issues.

## Our Purposes

There are numerous water-related problems associated with climate change, such as droughts or heavy rain and snow. These events are worsening. Water is an overarching theme of the UN's SDGs and is also related to the history of the region. Cross-generational efforts are needed if we are to resolve water-related problems. This is why the Youth Water Forum is inviting those of high-school age to create and submit videos related to water.

## Themes of the Video

You are free to choose from water-related events in your neighborhood, water-related research, international exchange activities, or water-related volunteer activities and traditional events.

## Call for Entries again in 2022!

We will continue this program as an annual event.

Our videos will be shared with the world

We will plan online events for youth.

To mark the year of the international conference (WWF and APWS) we will be holding a special event. Details will be released as soon as the plans are firm.
