

3. Rehabilitation of wells in Chipaka village (Tanzania)

- (1) Local partner: WANAWAKE PAMBANO GROUP (#242)
Funded in November, 2021. A women-led group involved in activities incorporating micro-financing.
- (2) Budget for the project: \$2,200 (Breakdown of funds: JWF Fund: \$1,500, implementing organization: \$200, beneficiaries: \$200, other donor agency:\$300)
- (3) Number of beneficiaries: 650 people
- (4) Current situation:
 - a. In the targeted area, people suffer from shortages of safe, clean water. Women in particular live in hard circumstances because they have to use unsafe wells or wait for long periods to collect water.
 - b. These water-related challenges have made the lives of people already facing economic hardship even worse.
 - c. Fetching water is regarded as the work of women and children. Therefore, they are under a heavy burden and face great risks.

Proposed site for the installation of the solar-powered pump

- (5) Details of the project:
Establishment of a committee dealing with the safe use of water; installation of a solar-powered pump and storage tank; training for volunteers
