

# “Continuous efforts for stable water supply in Yokohama”

**Mr. NAKAI Kazunori**

Manager of Southern Water Distribution Management  
Yokohama Waterworks Bureau(YWWB)

**Date and Time: 22nd September 2021 (Wed)  
7:00 – 8:00AM (UTC) / 4:00 – 5:00PM (JST)**

## **Overview**

### **- Ceaseless Efforts Overcoming Water Challenges Japan's Experience -**

Water supply is one of the most fundamental infrastructures for human life. Still, many water utilities are struggling to manage water supply business, particularly in developing countries.

The achievement of stable water supply in Japan is the result of secure daily management and operations besides advanced technology.

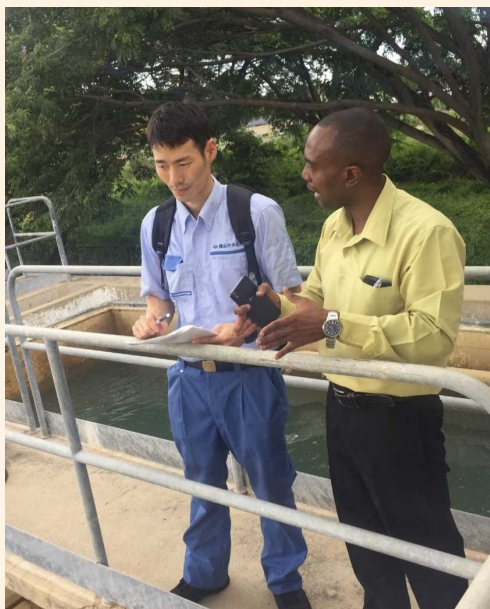

Actually, the core technology of water supply system is almost the same in any countries, but the situation of stable water supply is considerably different. What makes this difference is how well daily management and operations are implemented.

This webinar will introduce continuous efforts of YWWB, which developed the first modern waterworks in Japan, for stable water supply from the aspect of daily management and operations.

## Speaker: Mr. NAKAI Kazunori

Born in 1985 in Kobe, Japan.

Mr. NAKAI Kazunori, has been working as a civil engineer in the field of water supply, sewerage and road construction for more than 10 years after completing the Master's degree of Civil Engineering at Kobe University.

He joined the City of Yokohama in 2013 after the several years' experience in a private construction company.

He was engaged in the replacement of aged distribution pipeline as a manager of design section for a couple of years. From April 2018 to March 2021, he was transferred to JICA headquarter and engaged in some ODA projects in water sector.

He is also certified with Professional Engineer, Japan in the field of Civil Engineering and Water Supply.

The Japan Water Forum (JWF) disseminates water-related knowledge and information at home and abroad, supports grass-roots activities in developing countries through a self-help approach, plays a critical role as a think tank in the global water sector, and engages in capacity building and awareness-raising activities.
