

# Sewerage and Water Environment Improvement

## Mr. OHKAMI Yohei

Director for Overseas Projects of Sewerage,  
Sewerage International Affairs and Engineering Office,  
Ministry of Land, Infrastructure, Transport and Tourism (MLIT)

**Date and Time: 19th January 2022 (Wed)**  
**7:00 – 8:00AM (UTC) / 4:00 – 5:00PM (JST)**

## Overview

**- Ceaseless Efforts Overcoming Water Challenges through Japan's Experience -**

Preserving a clean water environment is essential for sustainable development and has always been a matter of great concern in the world.

Improvement of the water environment in Japan is the result of the effective legal framework and continuous efforts for sewage works. The Sixth JWF Webinar will share the knowledge and experiences accumulated through the history of fighting over water pollution due to the economic growth in Japan.

To improve the water environment, it may not be necessary to use the same framework as in Japan.

However, since we face the same challenges, Japan's framework would be a useful reference for any country suffering from water pollution.

## Speaker: Mr. OHKAMI Yohei

Born in 1986 in Nagano, Japan.

Mr. OHKAMI Yohei, has been working as a civil engineer in the field of sewerage, water and disaster management for more than 10 years.

He joined MLIT in 2008 after completing the Bachelor's degree in Civil Engineering at Ritsumeikan University.

He was engaged in the Sewerage and Wastewater Management Department, as chief of the planning section for several years. From March 2016 to March 2019, he was transferred to the Embassy of Japan in the Kingdom of Saudi Arabia, as the first secretary and infrastructure attaché.

The Japan Water Forum (JWF) disseminates water-related knowledge and information at home and abroad, supports grass-roots activities in developing countries through a self-help approach, plays a critical role as a think tank in the global water sector, and engages in capacity building and awareness-raising activities.
